***Specification***

1. The abstract of the disclosure is objected to because in line 5 the term "secure" should be changed to - -achieve- - or a similar term in order to be more clear. Strength cannot really be "secured," but it can be achieved, or attained, or provided. Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: In lines 1-3 of page 21 the recesses are described as being open toward the front end portions of the right and left wing portions. However, in the figures 5A and 5B of the drawings it appears that the recesses open toward the *sides* of the wings. Therefore, the specification, when read in light of the drawings, is confusing as to what is being described.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 6 the "front end portion" is inferentially claimed, and thus the claim is indefinite as to which direction the recess portions open toward, and to whether or not the front end portion is being claimed.

Appropriate correction is required.

***Allowable Subject Matter***

4. Claim 9 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 112, second paragraph, set forth in this Office action.
